PROFESSIONAL SUMMARY

Software Engineer with 7+ years of experience building production applications across mobile, web, and desktop platforms. Specialized in Flutter with Dart FFI for native system integration. Experienced in modernizing legacy systems and developing cross-platform applications for enterprise and professional audio solutions.

TECHNICAL SKILLS

- **Languages:** Dart, JavaScript, TypeScript, C++, C#
- **Frameworks:** Flutter, React, Node.js, NestJS
- **Native Integration:** Dart FFI, Dante Audio Networking, AES70 (OCA Protocol)
- **Backend & APIs:** REST APIs, GraphQL, Firebase
- **State Management:** BLoC, Provider, Riverpod
- **Databases:** SQLite, PostgreSQL, Firestore
- **Development & DevOps:** Git, GitHub, Docker, GitHub Actions, CI/CD, VS Code
- **Platforms:** Android, iOS, Web, Windows, macOS, Linux

CORE COMPETENCIES

- Structured Problem Solving
- AI-Assisted Development
- Cross-functional Collaboration
- System Integration
- Software Design
- Continuous Improvement
- Quality-focused Engineering
- Ownership & Accountability

EDUCATION

Bachelor of Science in Computer Engineering - 2019
Negros Oriental State University

WORK EXPERIENCE

○ Software Engineer - Karno Sound | Remote (London, UK) | Jan 2024 - Jul 2026

Developing SEPIA, a professional audio control platform for digitally managed studio hardware.

- Developed Flutter applications with Dart FFI to integrate native C++ audio libraries.
- Integrated Dante APIs and AES70 to enable audio routing, device discovery, and remote device control.
- Refactored legacy modules into a modular BLoC architecture for improved maintainability.
- Enhanced GitHub Actions CI/CD workflows for automated testing and deployment.
- Collaborated with frontend, native, and firmware engineers to deliver integrated software solutions.

○ Software Engineer - Experience Digital | Remote (Sydney, AU) | Mar 2023 - Nov 2023

Developed enterprise business and event management applications.

- Developed Flutter features for a production event management application.
- Migrated legacy platform modules to React, NestJS, and TypeScript.
- Designed PostgreSQL database schemas and implemented GraphQL integrations.
- Utilized Riverpod, Redux, Docker, and CI/CD throughout the development workflow.

○ Flutter Developer - Xurpas Inc. | Remote (Makati, PH) | Aug 2022 - Feb 2023

Contributed to the development of MetaCare, a healthcare mobile application.

- Developed responsive Flutter user interfaces from Figma designs.
- Built reusable Flutter widgets and shared UI components for consistent application design.
- Implemented BLoC architecture to improve state management and code organization.

○ Software Engineer - Kyocera Document Solutions Philippines | Hybrid (Cebu, PH) | Jul 2021 - Aug 2022

Developed enterprise software supporting printer management, device communication, and business operations.

- Developed C# backend services for enterprise device communication.
- Maintained AngularJS web applications supporting printer management systems.
- Developed and maintained SQL Server databases for business applications.

○ Software Engineer - Bluebeans Systems | On-site (Dumaguete, PH) | Jun 2018 - Jun 2021

Built business process automation and document management solutions for enterprise clients.

- Developed the QPro queue management system for customer service operations.
- Built document archiving applications using C# WinForms and Flutter.
- Developed MySQL backend integrations for business management applications.
